Last updated: Feb 2025

EDUCATION

Hanyng University, Seoul, Korea

(Expected) Mar 2022 - Feb 2026

B.S. in Data Science (2nd major: Economics&Finance)

Overall GPA: 4.39/4.5, Major GPA: 4.37/4.5 (credits taken: 128)

RESEARCH EXPERIENCE

Research Assistant

Jul 2024 - Present

Advised by professor Seunghwa Rho

[\[code\]](#)

- Built Generalized Random Forest(GRF) that is modifiable to apply custom moment condition.
- Applied custom Smoothed Estimating Equation to conduct quantile regression using GRF.

PROJECTS

Development of commodity future trading simulation system

Sep 2024 - Dec 2024

Project in 'Business Lab' project course

[\[code\]](#)

- Replicated research on the dynamic slope strategy, which is a trading strategy for commodity futures.
- Follow-up research based on Basis Momentum is currently ongoing.

Mathematics question keyword extraction using LLM Zero-Shot

Sep 2024 - Dec 2024

Group project in 'Human-Computer Interaction' course

[\[code\]](#) [\[demo video\]](#) [\[report\]](#) [\[poster\]](#)

- Designed a service that extracts key ideas for solving Korean SAT Mathematics question, given user-taken photo.
- Implemented OCR and LLM for keyword extraction from images and built a product prototype using Next.js.
- Made a questionnaire and conducted a paired T-test to evaluate the prototype's effectiveness.

SKILLS

Advanced

Python

Moderate

Cython, PyTorch, LaTeX

Novice

C, C++, Next.js, Stata
